

### **Dr Reddy's unveils Melgain lotion**

Hyderabad, June 13

Drug maker Dr Reddy's Laboratories launched Melgain, a lotion that has been approved for the treatment of vitiligo (skin pigmentation disorder). The medication has been launched in partnership with Issar Pharmaceuticals. Vitiligo is a skin disease that leads to white patches due to the loss of normal skin pigment called melanin. Globally, Melgain lotion is the first peptide-based drug for the treatment of vitiligo. It has been indigenously developed in India. OUR BUREAU
