

## **Wockhardt recalls 109,744 bottles of drug from US mkt**

**Hyderabad, May 15:** Wockhardt is recalling 109,744 bottles of anti-hypertensive drug belonging to multiple lots from the US market following failure of dissolution test, US regulator FDA said. According to a notification by the USFDA, the recall is voluntarily and was initiated by the company from April 1 under 'Class-II' classification. The recall of metoprolol is a generic version of AstraZeneca's branded drug Toprol.
