

## Pharma market sees 6.4% growth in April

**Mumbai:** The Indian drug market grew 6.4% over the year-ago period. Sales of ₹7,338 crore were recorded during the month.

"The industry experienced a sluggish February, where the year-to-year growth was a paltry 7%. March saw the wheels get back into motion, with chronic therapies and local companies driving growth; however April has again been a sluggish month with a growth of just 6.4%," said a April sales report released by pharma market researcher IMS Health India on Monday.
